

PATIENT MESSAGING GUIDE

WHAT IS LASER THERAPY?

Laser Therapy is a proven, non-drug, holistic solution that harnesses the power of light to relieve pain in different parts of the body and promotes a natural recovery process in the body.

HOW DOES IT WORK?

Summus' Class IV Laser technology is calibrated to deliver specific red and near-infrared wavelengths of laser light to induce a therapeutic effect within the body.

WHAT IS THE SUMMUS STANDARD?

With over 18 years of experience in laser therapy, Summus Laser Therapy is offered in over 50 countries with thousands of systems worldwide. A Summus Laser Therapy treatment is performed every 8 seconds.

WHAT DOES A TREATMENT FEEL LIKE?

There is little to no sensation during treatment. Occasionally, the patient may feel mild warmth or tingling sensations and treatment areas may briefly feel sensitive before pain relief.

ARE THERE ANY SIDE EFFECTS?

Very few side effects have been reported. Old injuries or chronic pain areas may have some sensitivity for a few days post-treatment.

HOW OFTEN SHOULD I RECEIVE LASER THERAPY OR HOW MANY TREATMENTS DOES IT TAKE?

That varies depending on the patient and treatment area. After your initial consultation, we will work with you to determine a treatment plan that is customized to your needs.

WHEN WILL I SEE RESULTS?

Results will vary by patient. Patients have reported improvements after the first treatment. Some results may need 3 to 4 sessions depending on the condition.
